MORETON HIRE

EXPERIENCE IS EVERYTHING

In today's environment, you need a supplier you can trust. We are a national supplier, providing a quality install with one point of contact. We act quickly and help support your changing needs.

Our range of temporary structures can help with; medical response, emergency accommodation, staff lunchrooms, isolation units, medical equipment storage, people processing, mobile testing facilities, mobile vaccination centres, mobile hospitals, crowd staging and disaster relief. Our solutions provide quick sites for Medical Teams, First Responders and Frontline Workers.

All our temporary structures are engineered and constructed to the Australian Building Code.

**A RAPID RESPONSE PROVIDER,
AVAILABLE NATIONWIDE.**

Who we are

FOUNDED IN 1969

Moreton Hire was founded in 1969 by Marlene and Kevin Morahan in Manly, Brisbane. The Morahan's bought chairs for the school fete, but before they knew it, the locals were putting in their borrowing requests. "Moreton Bay Hire" was officially born in their family garage, offering party and building equipment for hire.

CONTINUOUS INNOVATION

Since these humble beginnings, the company has continued to reinvent itself. With its products, services, technology and sectors continuously developed to offer a modern service for our customers. Today, Marlene's children and grandchildren continue to drive Moreton Hire to be Australia's largest temporary structure provider.

SERVICES TO HELP

Our semi-permanent structures can be installed and modified to suit your requirements. Modular in design and high in quality, we offer;

- Products that are engineered and constructed to the Australian Building Code
- Hard walls, floors and doors options for security
- HVAC solutions for tackling the weather
- Optional high legs structures to allow for extra height
- Optional inflatable roof technology which reduces internal temperature by 5-7 degrees
- Safety – Fire retardant vinyl installed in all structures

SO, WHY RENT?

- No capital investment required
- No burden on your liquidity
- Rental duration specific to your needs, with the option to extend
- Minimal maintenance and running costs
- Rapid deployment
- Installed and removed quickly
- No building approvals

Our project managers and team of specialist engineers will prepare the right space concept for your intended use – keeping you in the loop at all stages. From warehousing and storage for various applications to enclosures for environmental remediation, production halls, showrooms, staff rooms or amenities.

STRUCTURE SAFETY

What are you covered for?

One of the biggest unanswered questions in the temporary structure industry is, will your structure engineering satisfy the Australian Building Codes?

Rest assured, Moreton Hire have been in the temporary structure business for over 50 years and our specialist team have the experience and qualifications to guarantee a temporary structure for your next business or personal event meets every standard!

MORETON HIRE

Our standards

FOR TEMPORARY STRUCTURE BEST PRACTICE

1

CERTIFICATION CERTIFICATES

All Current Engineer Certification Certificates are supplied and signed off.

ADVERSE WEATHER MANAGEMENT PLAN

We provide an Adverse Weather Management Plan & certifications for Terrain and Wind Speed Security.

2

3

COMPLY WITH BUILDING CODES

All our Structure installations comply with Building Codes and Event Acts in all Australian states.

WE MEET THE FIRE HAZARD PROPERTIES INDEX

All our materials and accessories meet the Fire Hazard Properties Index.

4

5

DESIGNED FLOOR PLANS

Our Floor Plans are designed to meet access and egress and current fire-fighting standards.

Vaccination hubs

Australia's fight against COVID19 in 2020-2021, has meant a rapid response to build testing and vaccination super hubs across the country. The Moreton Hire Team have been on hand to help act quickly and safely to build solutions to support the initiatives of health bodies. From temporary marquees, walling and sound-reducing panels, to infection control furniture solutions. The response has seen us convert warehouses, car parks and venues to test, screen and vaccinate Australians – all within a few days. To learn more, speak to your Moreton Hire representative today.

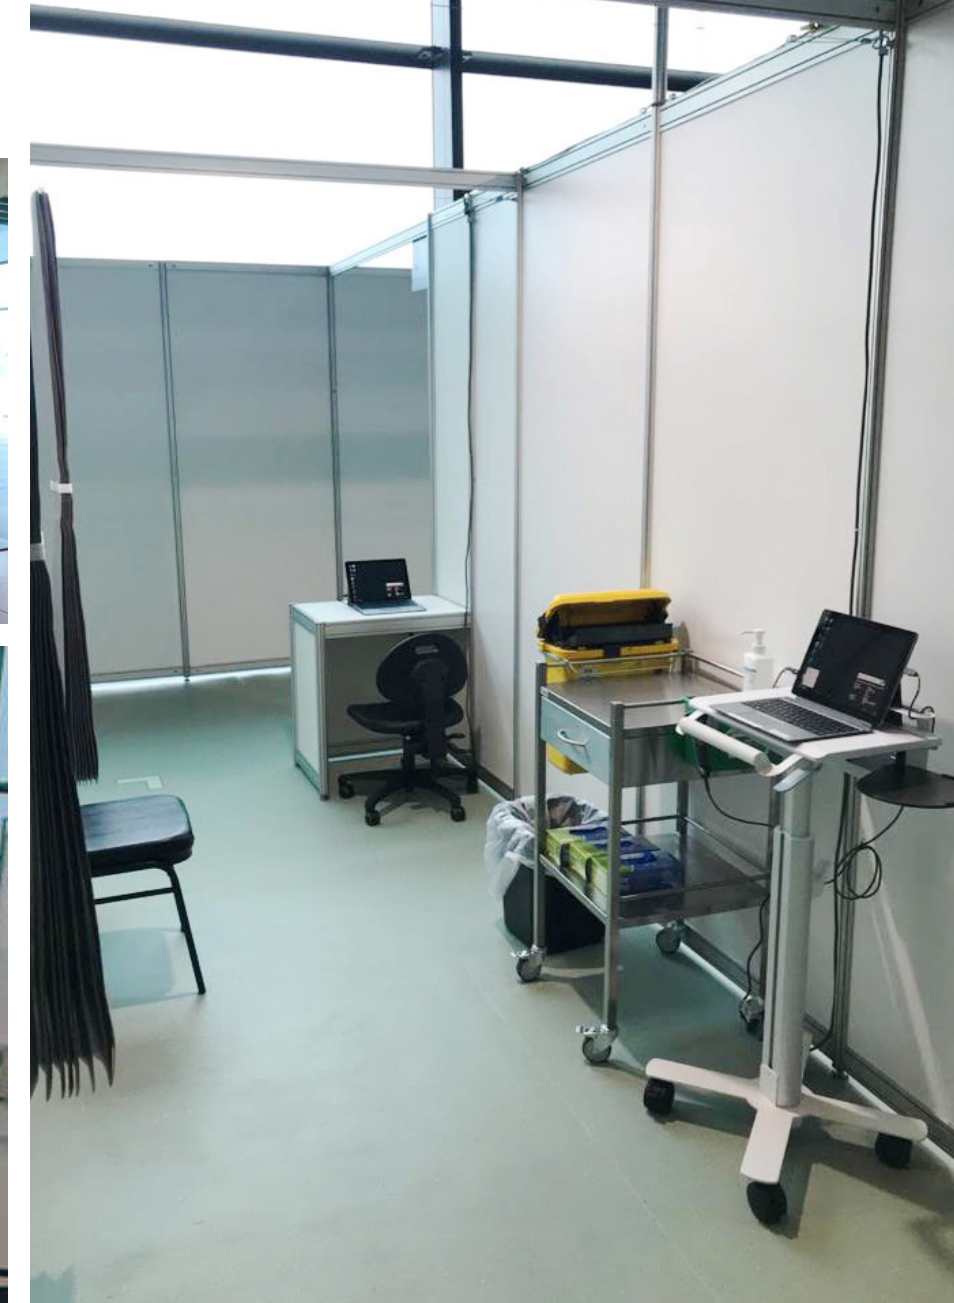

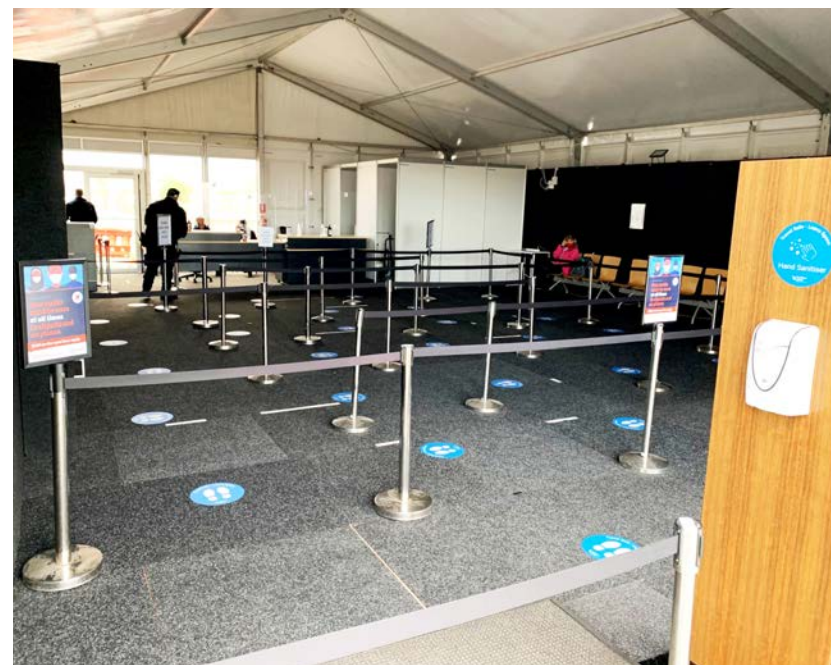

Airport screening solutions

The first line of defence against COVID 19! Our custom airport solutions include; temporary structures, crowd control, furniture and equipment. Used in these images at the Melbourne Tullamarine Airport and Sunshine Coast Airport. Both spaces were designed to screen, test and in some cases, vaccinate front line workers and arrivals.

MEDICAL RESPONSE

COVID-19 emergency facilities

Available now and take only hours to deploy and build. Our semi-permanent structures have been installed as emergency facilities, warehouse and storage.

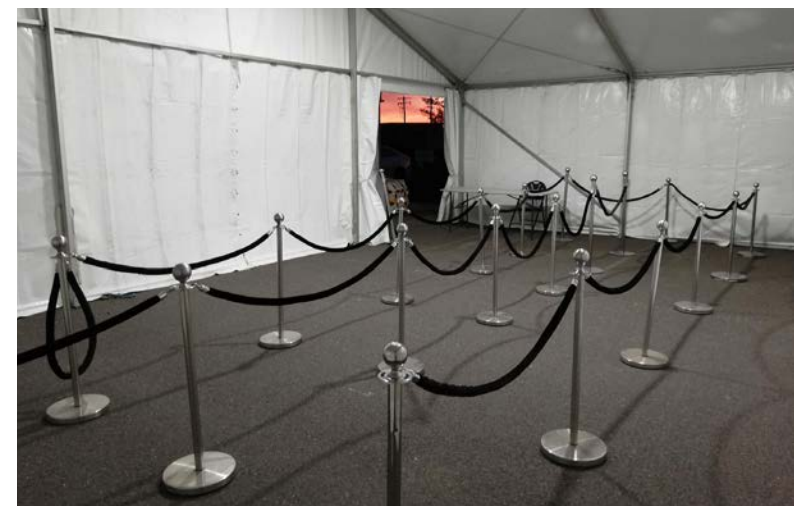

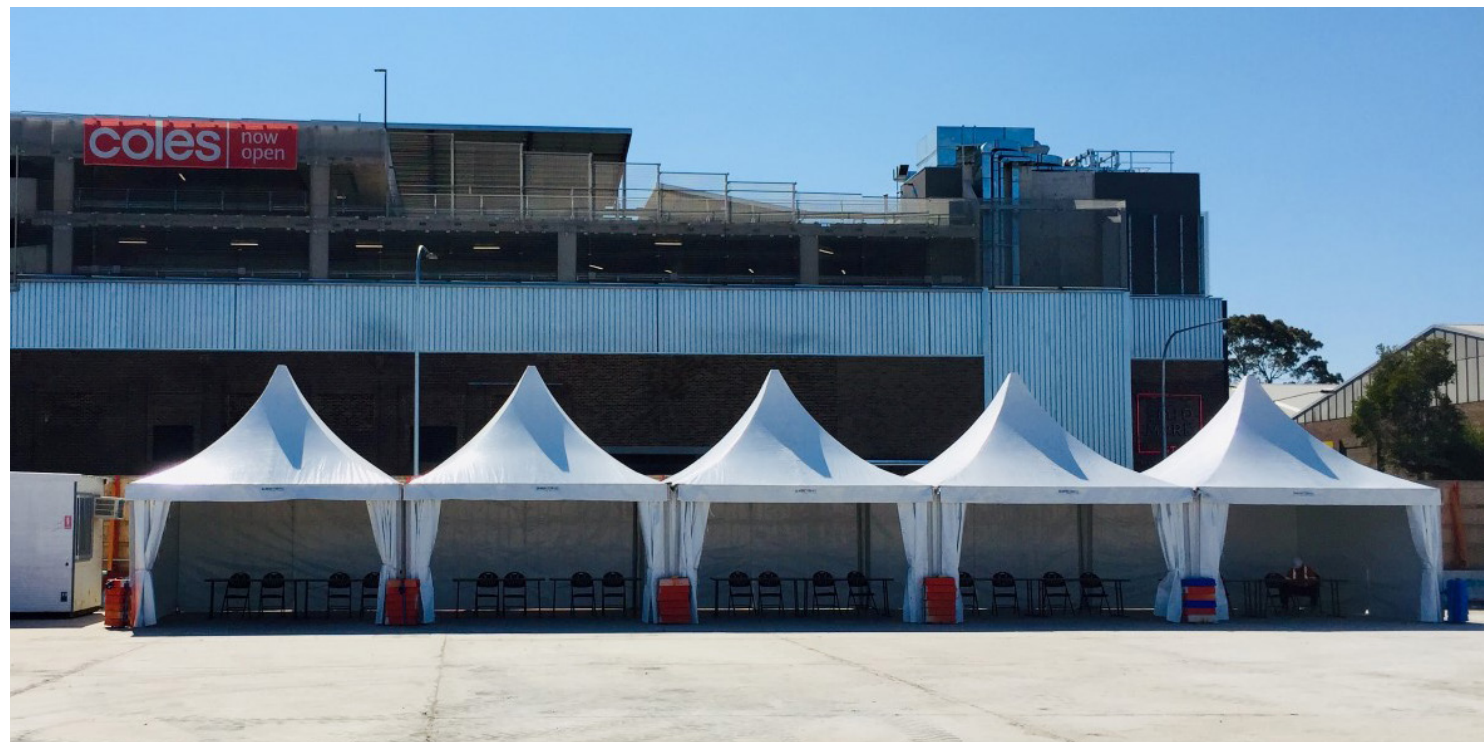

MEDICAL RESPONSE

Rapid testing sites

Rapid by name, rapid by nature! We've been installing these repid testing sites with in 24-48 hours from confirmation. We have a vast range of temporry structures which can be modified to suit your requirements. All temporary structures are engineered and constructed to the Australian Building Code.

MEDICAL RESPONSE

Drive-thru testing sites

Vehicle test sites easily assist with reducing the load and cross-contamination at local hospitals. Our structures can be modified to suit your requirements. Ranging in heights of 3.2m, 3.8m and 5.2m high to service cars through to trucks and coaches, these structures are 10m wide and the length can be changed to suit the location. All temporary structures are engineered and constructed to the Australian Building Code.

Quick to
install and
ready now!

MEDICAL RESPONSE

Extra high structures

Designed for vehicles. Our extra high structures are clear span, so facilitate vehicles of all sizes. Ask the team for more details or CAD plans.

Raise your
structure to new
heights

Assessment and Polyclinics

Our temporary solutions are perfect for creating isolation units, polyclinics, dividing walls, people segregation, clinics, offices and storage facilities. We also have a range of lockable doors to compliment the walling. We can also provide: desks and counters, bulk seating, trestle tables, directional signage (the holders/frames as well as the print), and sound-reducing panels.

MEDICAL RESPONSE

Triage rooms

Medical grade triage rooms can be built in a matter of hours.
All sizes and walls are modular in design and can be
arranged in different configurations.

MEDICAL RESPONSE

Decontamination tents & internal change rooms

Our structures and temporary walling can be used in different configurations to meet your requirements. Fast to install, they provide privacy and triage when required. Thousands of square meters are available – act today!

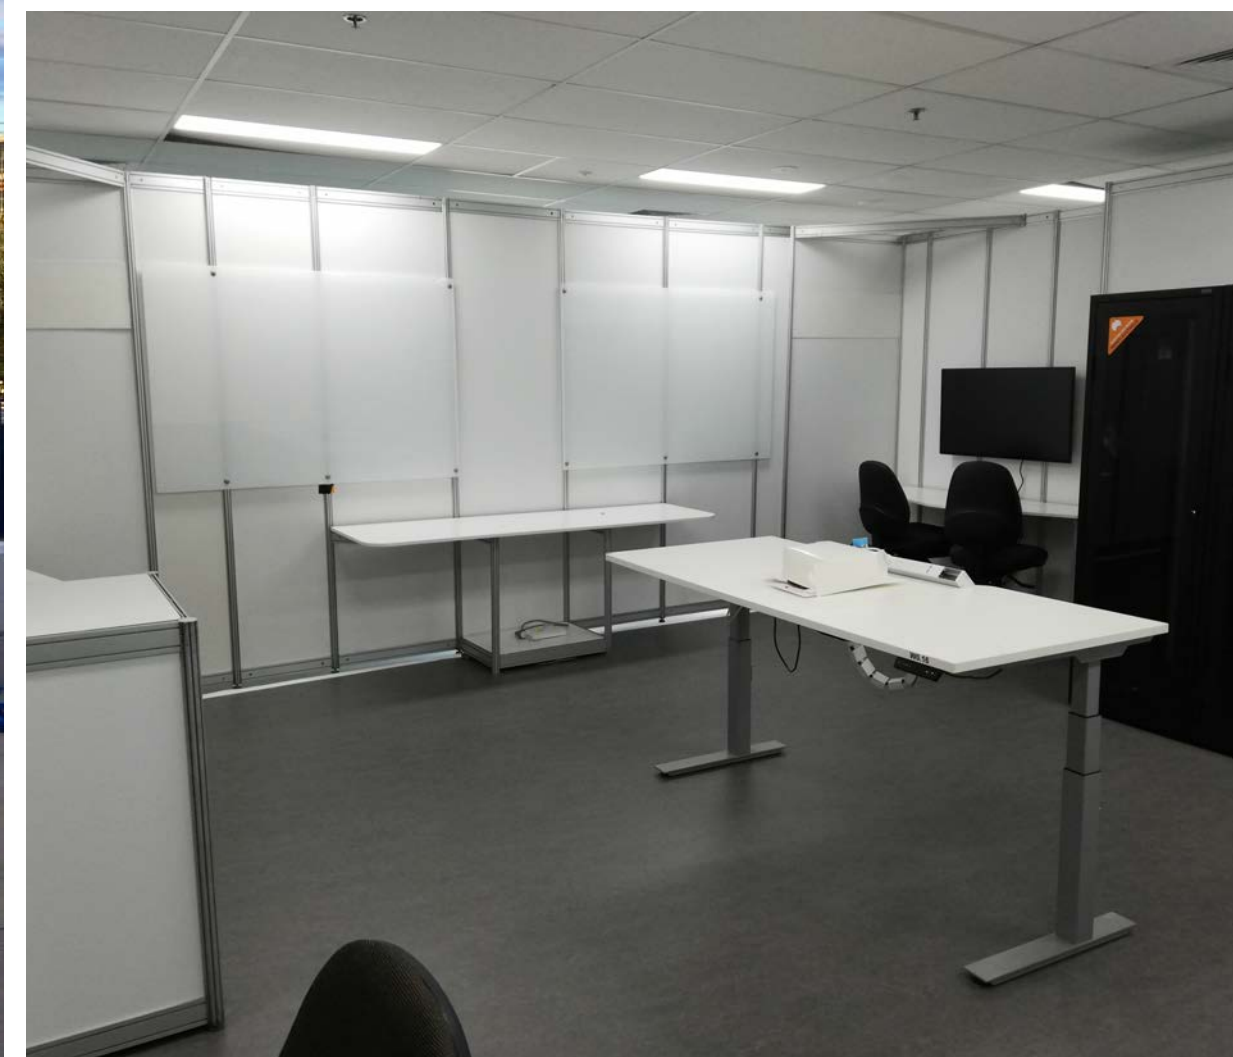

Donning & doffing space

Available now and taking only a few hours to deploy and build, our structures and temporary walling have been used for donning and doffing spaces. Walling is modular in design so can be used in variance spaces or configurations.

Onsite control centres

Get additional space – fast! Ready for rapid deployment. These 'turnkey' solutions range in size from 100m² to 4000m², can be weighted on car parks and can include: doors, ramps, HVAC, generators, emergency lighting, cassette floor (heavy duty vinyl on top), under floor cable track provision with cassette floor, internal lighting, sound proof walls, ceilings. All temporary structures are engineered and constructed to the Australian Building Code.

MEDICAL RESPONSE

First aid tents & quarantine

Don't risk it. Choose a solution that is proven and safe. Our structures are world class in quality and used for first aid tents and quarantine. Designed to protect against the elements. Ask the team today.

Temporary capacity issues? Not a problem!

MEDICAL RESPONSE

Check points

From security checking to first aid, medical facilities and COVID-19 related testing points, our range of temporary structures offer the right solution for your requirements.

MEDICAL RESPONSE

Staff amenities

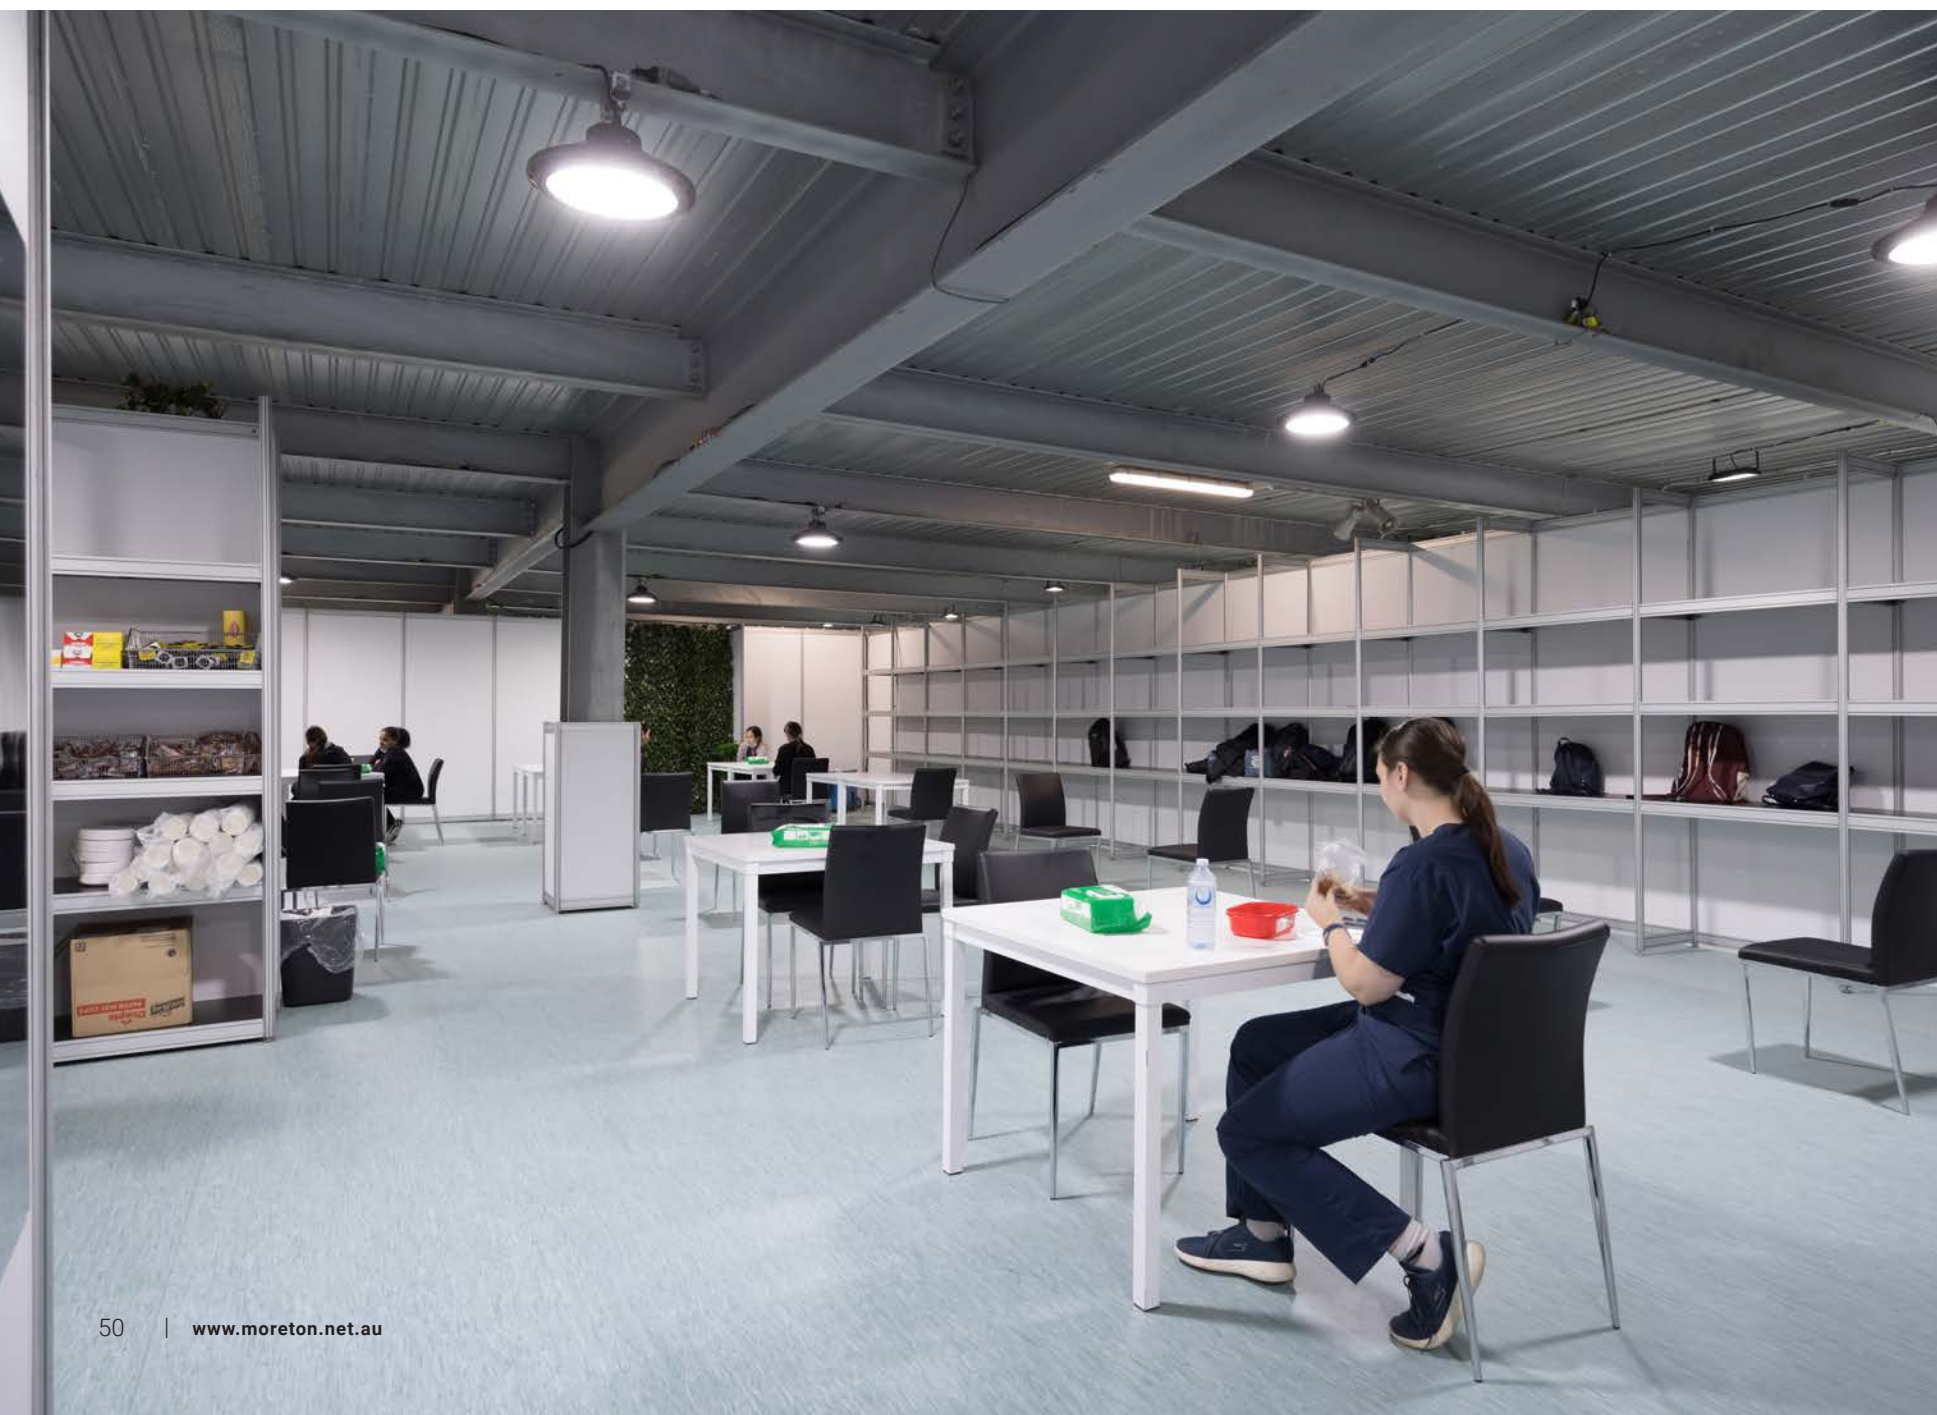

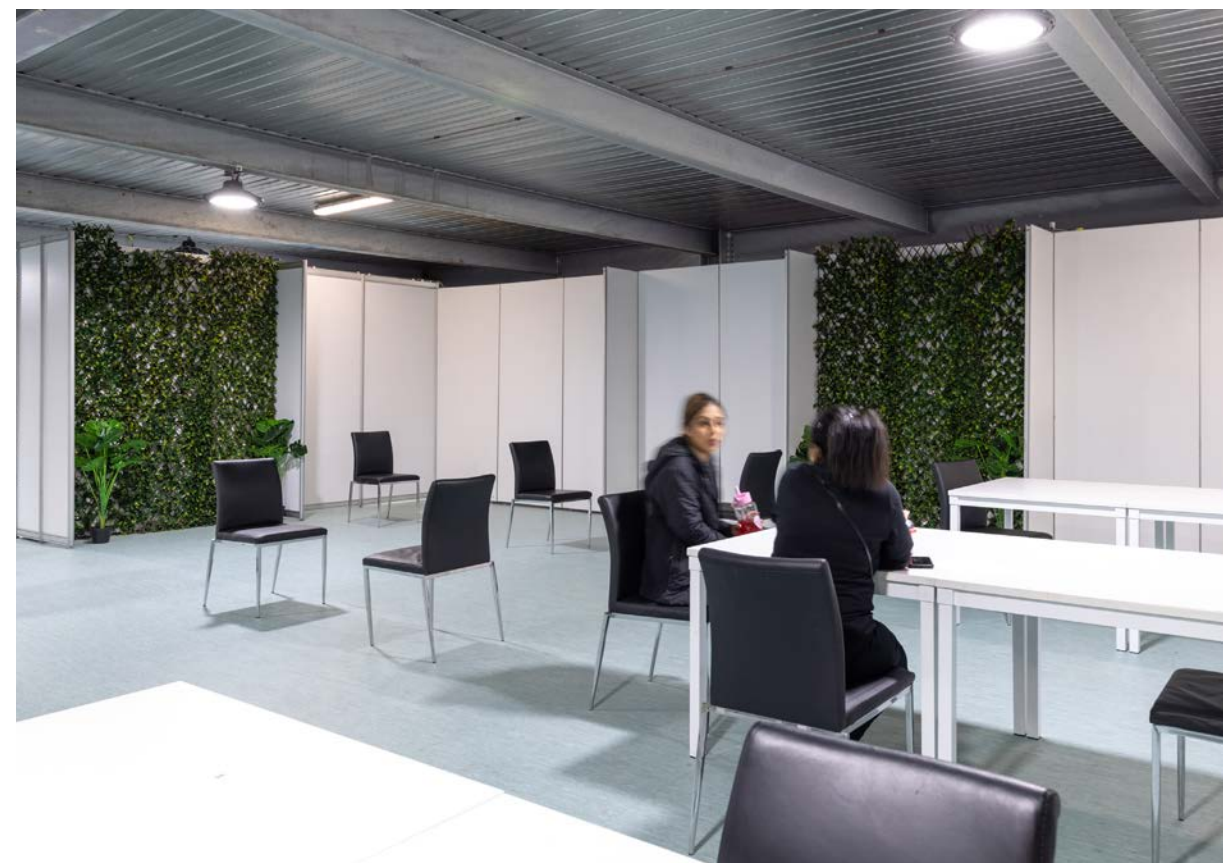

Our structures are regularly used for; equipment maintenance and storage, site shut-downs, camp canteens, staff amenities and assembly areas. All structures can include HVAC solutions for heating and cooling. Speak to the team today.

No forklifts are needed, and these can fit in tight spaces like car parks

Create additional space, without the wait

Weather proof & cold storage

Moreton Hire structures have the option of a double layer thermo roof – in a ground breaking technology for the industry. Designed for both hot and cool climates, the system offers roof stability, particularly when there are high winds, ensuring no flapping vinyl! Thermo rooves offer no water pocketing, reduce condensation, and reduce the ambient temperature by a minimum of 7° and more if air conditioned. Use as is, or build your own units within the structure.

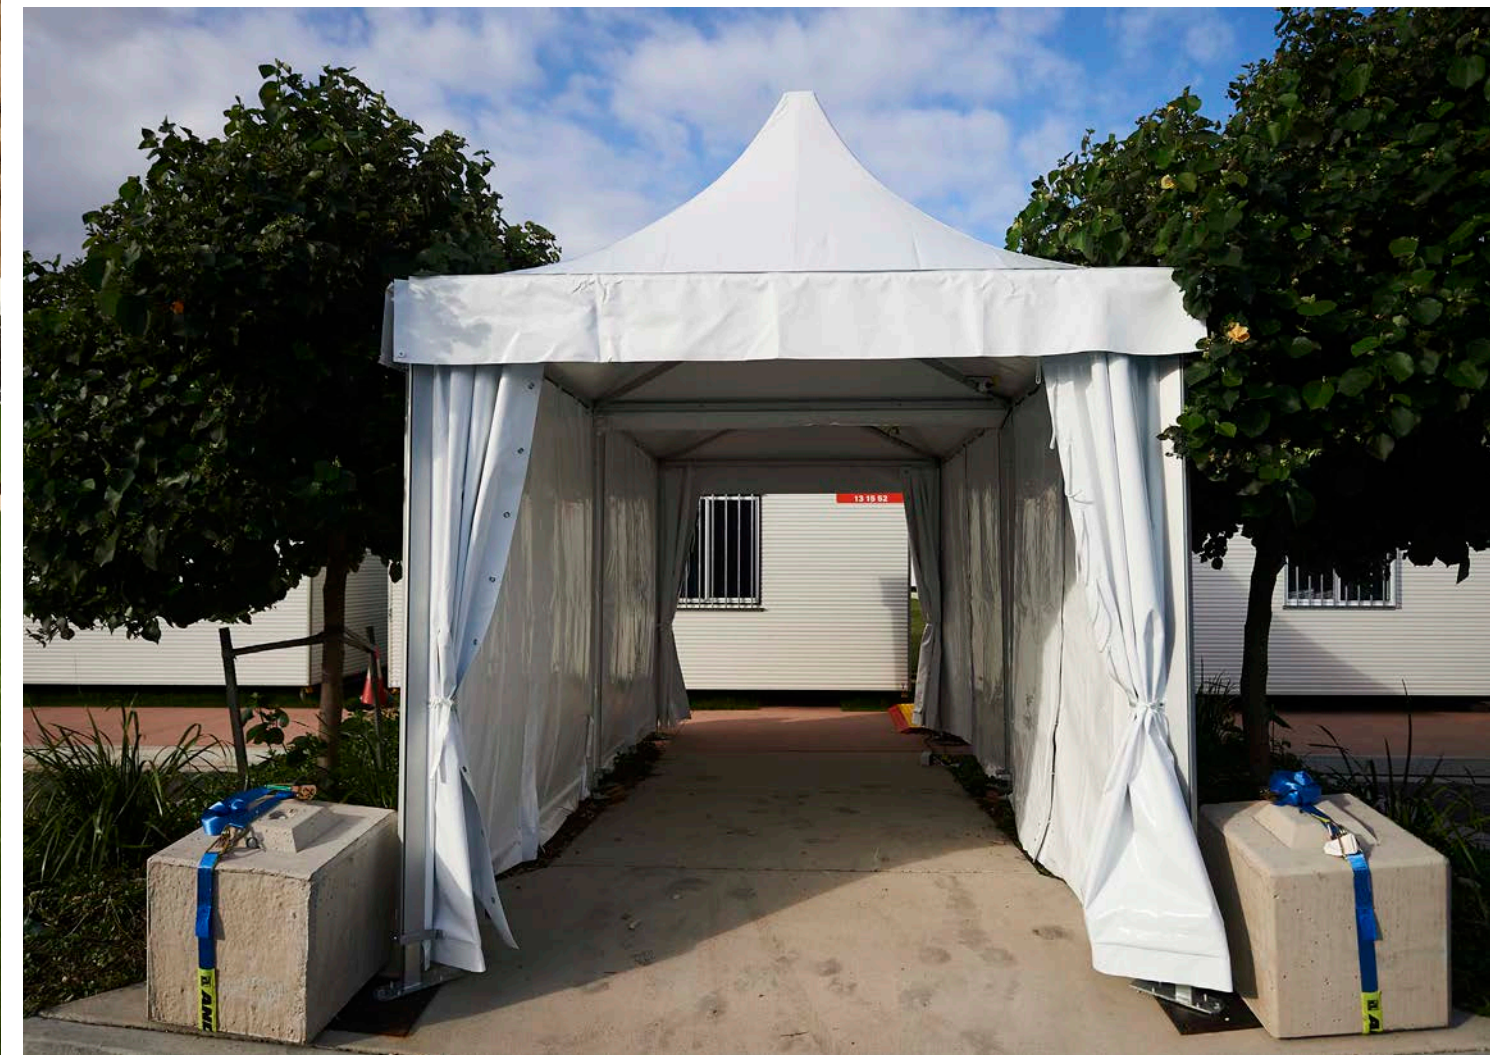

MEDICAL RESPONSE

Wet weather protection

Protection against the elements! Don't risk it with the Australian weather conditions.
From 3m x 3m pagodas, to larger marquees. Our tents can be used
for walkways or simply when you need more space.

MEDICAL RESPONSE

Site sheds & awnings

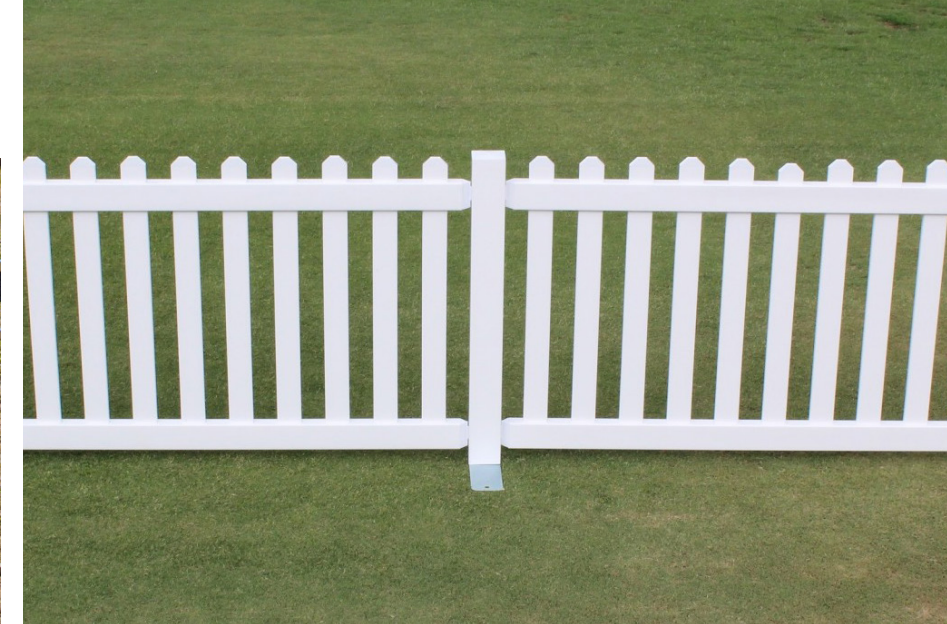

Modular in design, and sturdy against the elements! Our solution for site sheds and awnings, are popular due to their rapid nature of installation and flexibility in configuration.

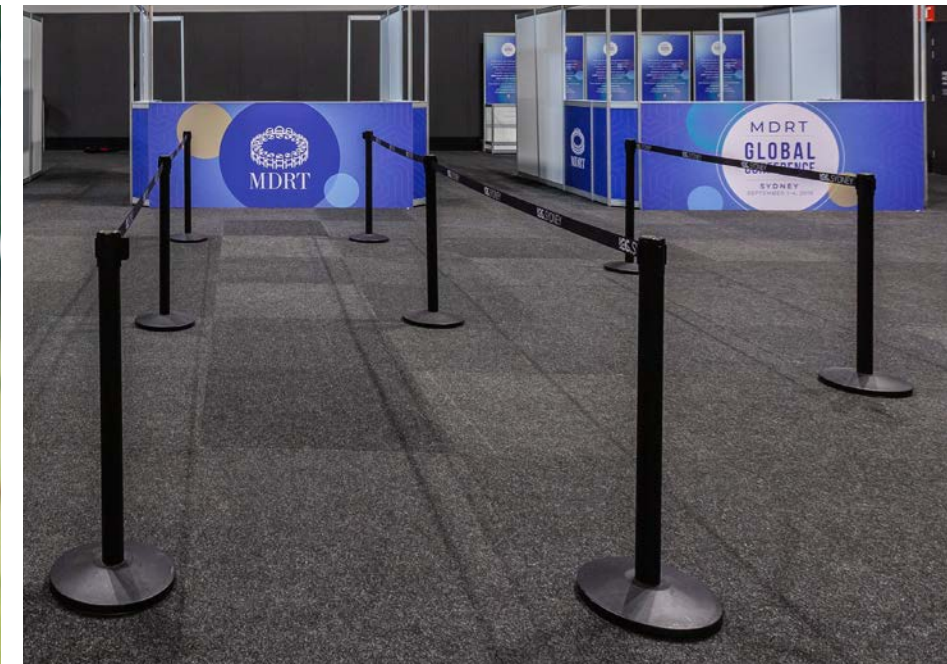

MEDICAL RESPONSE

Crowd control & fencing

Crowd control and fencing solutions are available. We hold thousands of meters of equipment in all locations, ready for rapid deployment.

Create
safe spaces
fast!

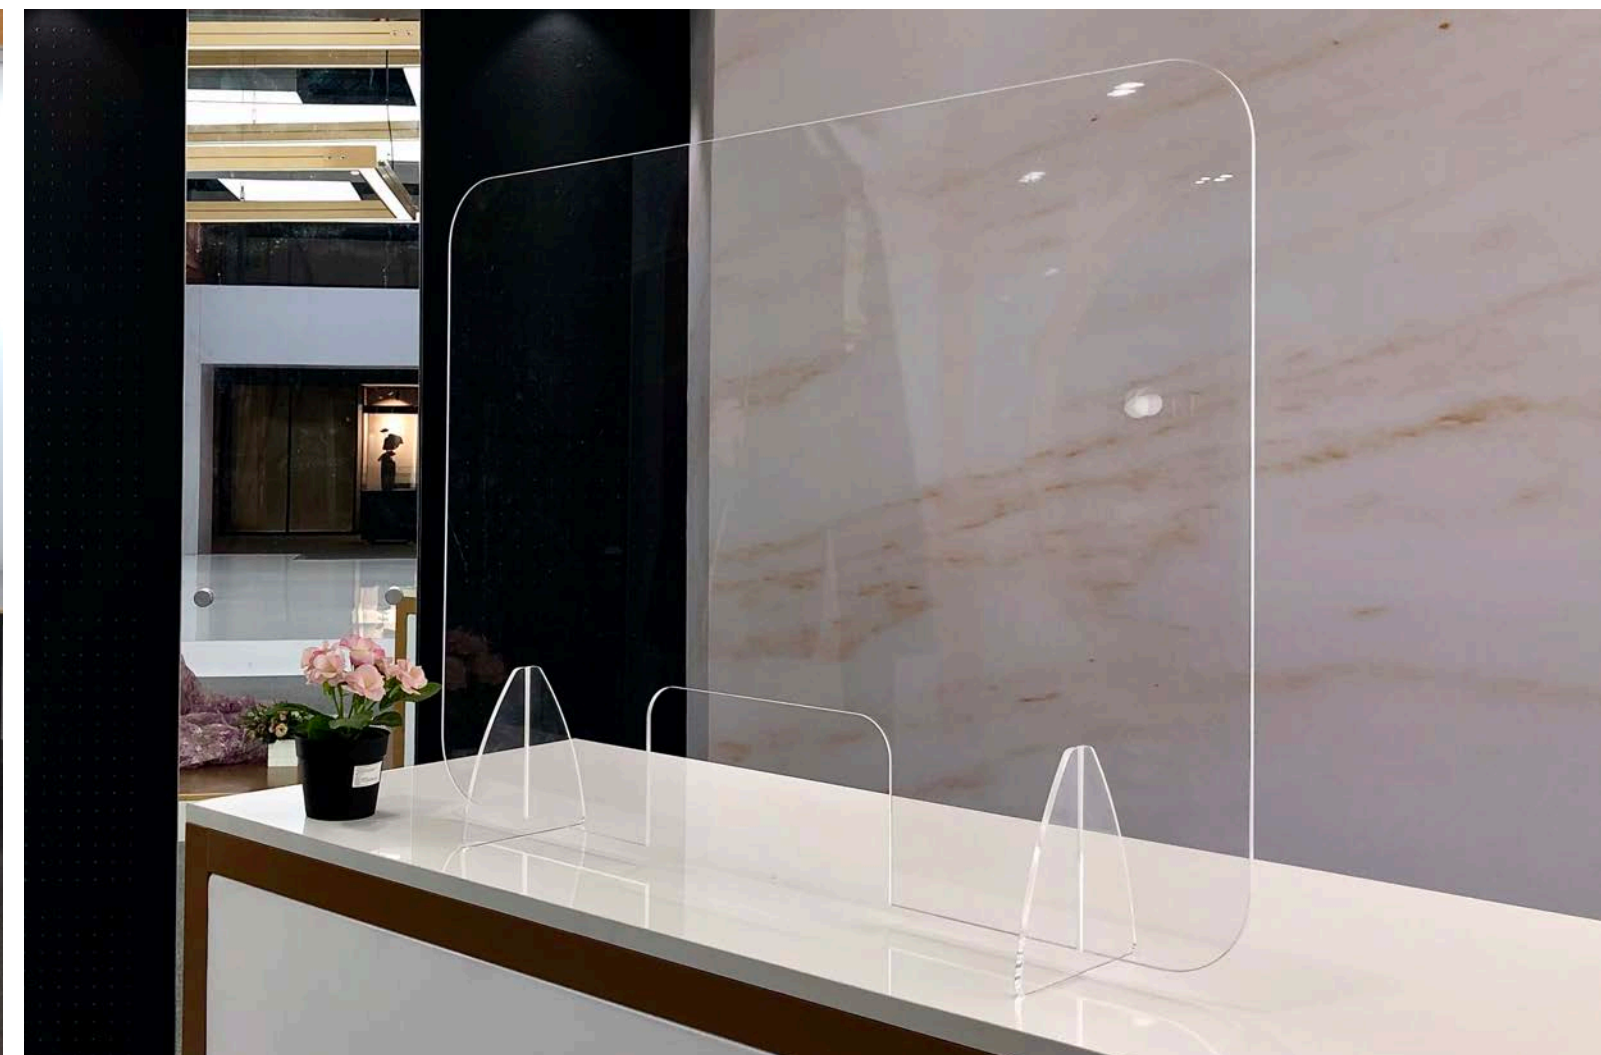

MEDICAL RESPONSE

Internal fit-out

Moreton Hire has a range of social distancing solutions to help you keep your staff and patients safe, and your business compliant. From indoor partition walling, acrylic screens and sanitiser units to temporary structures for extra space – all of our products are ready for rapid deployment!

MEDICAL RESPONSE

Signage

We offer a range of signage solutions from building and safety signs to banners and decals. Quality printing done locally. Ask us.

CASE STUDY | COVID VACCINATION SITES

Western Health at Sunshine Hospital

Our team was engaged to build one of Australia's largest vaccination super hubs in February 2021. With a tight 3 week turnaround, the scope included; installation of 2200sqm of temporary floor installed in a multi deck car park, temporary walls for cubicles, assessment spaces, hospital grade lino, lighting, furniture, plumbing and HVAC.

For further information or references please contact us.

Western Health

CASE STUDY | HEALTH SCREENING SITES

Rapid mobilisation of temporary structures

Our team were tasked with mobilising testing sites located Australia-wide, generally with 24 hours notice! From pop up drive-thru stops, to marquees built in car parks. Each fit-out included marquees, sanitising stations, sinks and internal partitioning. All DDA compliant, engineered and WorkSafe. Ask our team for more details today.

aspenmedical

“Thanks for all your efforts... we made some great things happen in a very short period of time, all of which contributed to the control of the virus in Australia!”

“ The work they (and your teams) did for us was tremendous and was carried out in a very short time frame... They had to develop a couple of ‘imaginative’ solutions and kept me fully informed at every step along the way which I greatly appreciated. A huge ‘thank you’ to all of the Moreton Hire team – I really appreciate your ongoing support. ”

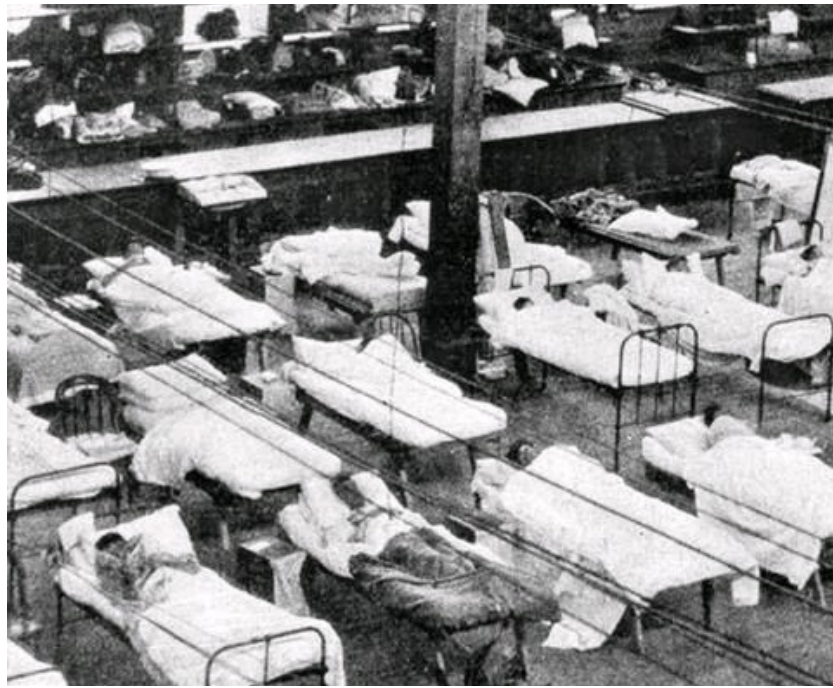

CASE STUDY | NSW STATE EMERGENCY SERVICES

Assistance for essential services

Moreton Hire deployed a 6-month, long-term hire installation at the State of Emergency Services Head Office.

The solution Moreton Hire offered was Syma Walling constructed to create a 6m x 6m square space. Usually an exhibition walling product, this versatile walling system can easily create divided space inside offices, warehouses and even marquees. Additional to the walling we provided custom fabricated desks to the exact shape and dimensions of the command centre, acrylic white boards and foamex reference slot windows and 42inch monitors custom mounted over 4 desks in the exact location required.

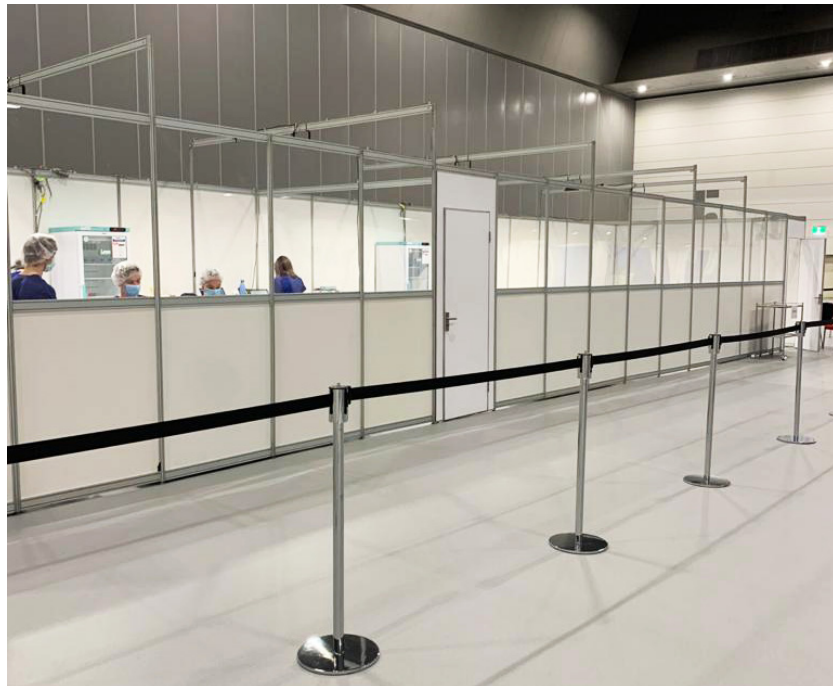

CASE STUDY | COVID VACCINATION SITES

St Vincent's Hospital – Royal Exhibition Building, Victoria

Did you know the Royal Exhibition Building in Victoria was one of the many venues used 102 years ago to deal with the Spanish Flu pandemic. Between March and August 1919 this location was transformed and treated over 4000 patients. Today, the team from St Vincent's Hospital are using this space to administer the COVID vaccine.

CASE STUDY | COVID VACCINATION SITES

Royal Melbourne Hospital – MCEC

Transformed in week! Take a look inside one of Australia's largest mass vaccination hubs at the Melbourne Convention and Exhibition Centre. It was built in early 2021, to administer the COVID19 vaccine to Victorians. In a pre-COVID era, our team would be using this equipment to build exhibitions, conferences and events. This project included; custom flooring, vaccination cubicles, counters, offices, furniture, lighting and electrical. Speak to our team to learn more. Visit our YouTube Channel to watch this space come to life.

[WATCH OUR INSTALLATION VIDEO HERE](#)

CASE STUDY | COVID VACCINATION SITES

Western Health – Melbourne Showgrounds

The Melbourne Showgrounds – typically used to host world-class events and exhibitions – was converted into a mass vaccination super hub for Victorians. Unique to this space was the crowd control system, and infection control flooring. The build for this hub included; cubicles, offices, vaccine storage, resuscitation bays, ambulance access, electrical, walling and furniture.

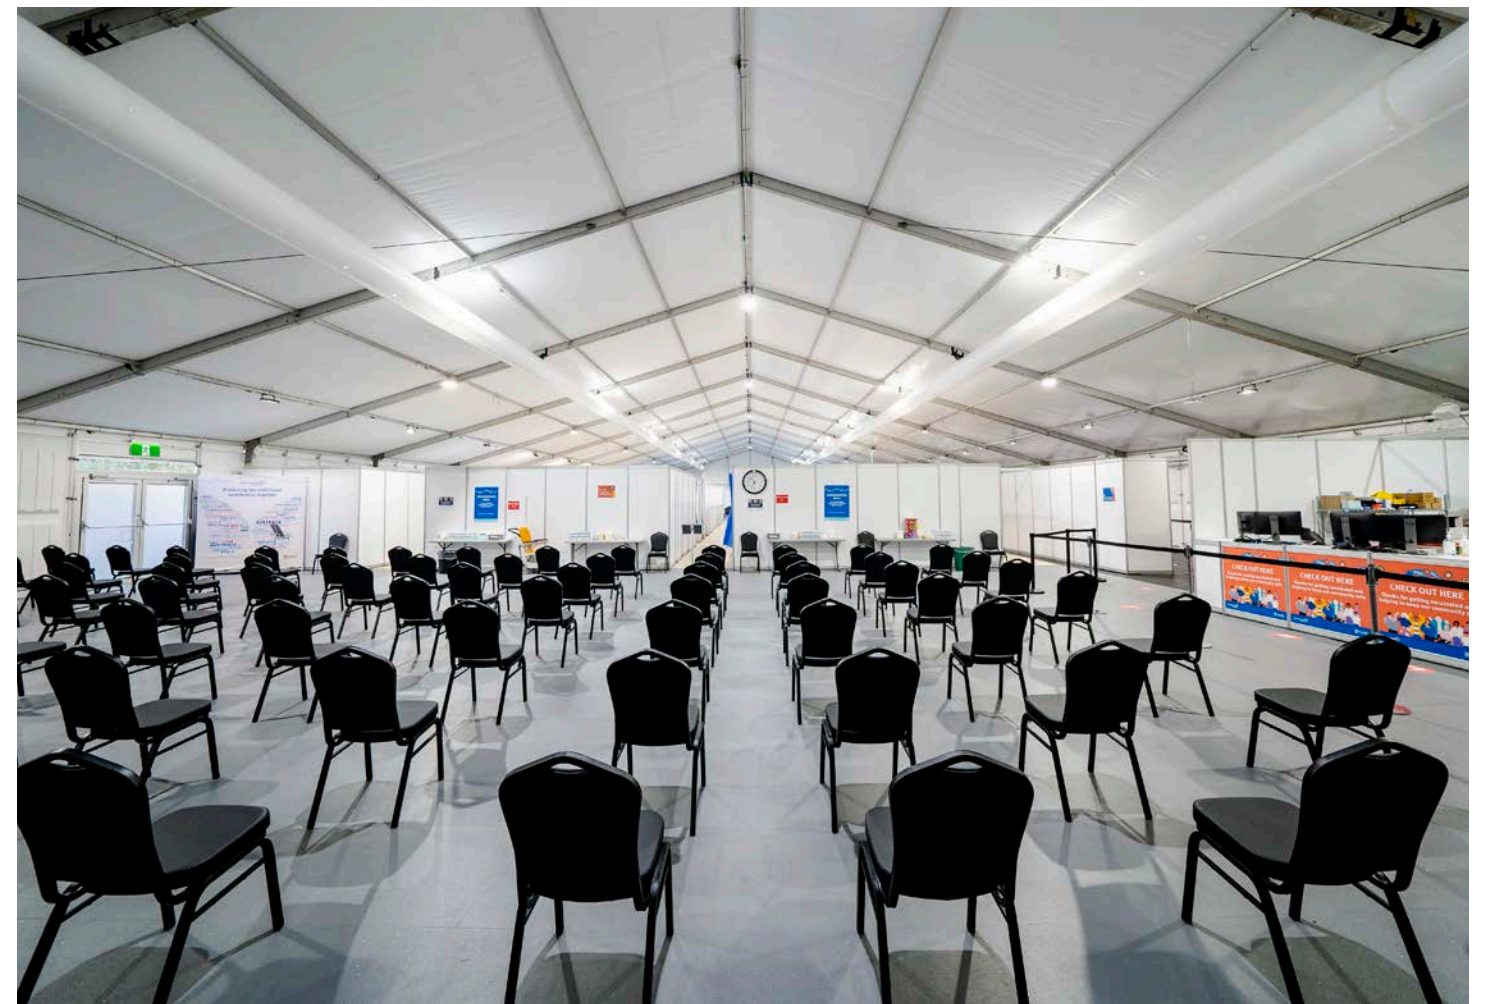

CASE STUDY | COVID VACCINATION SITES

Gold Coast Health Services - Vaccination Super Hub

46 vaccination cubicles, a pharmacy hub, office space, staff lunchrooms, amenities, waste management, signage, infection control furniture, and crowd control equipment. Take a look inside this hub by Gold Coast Health installation.

[WATCH OUR INSTALLATION VIDEO HERE](#)

CASE STUDY | COVID VACCINATION SITES

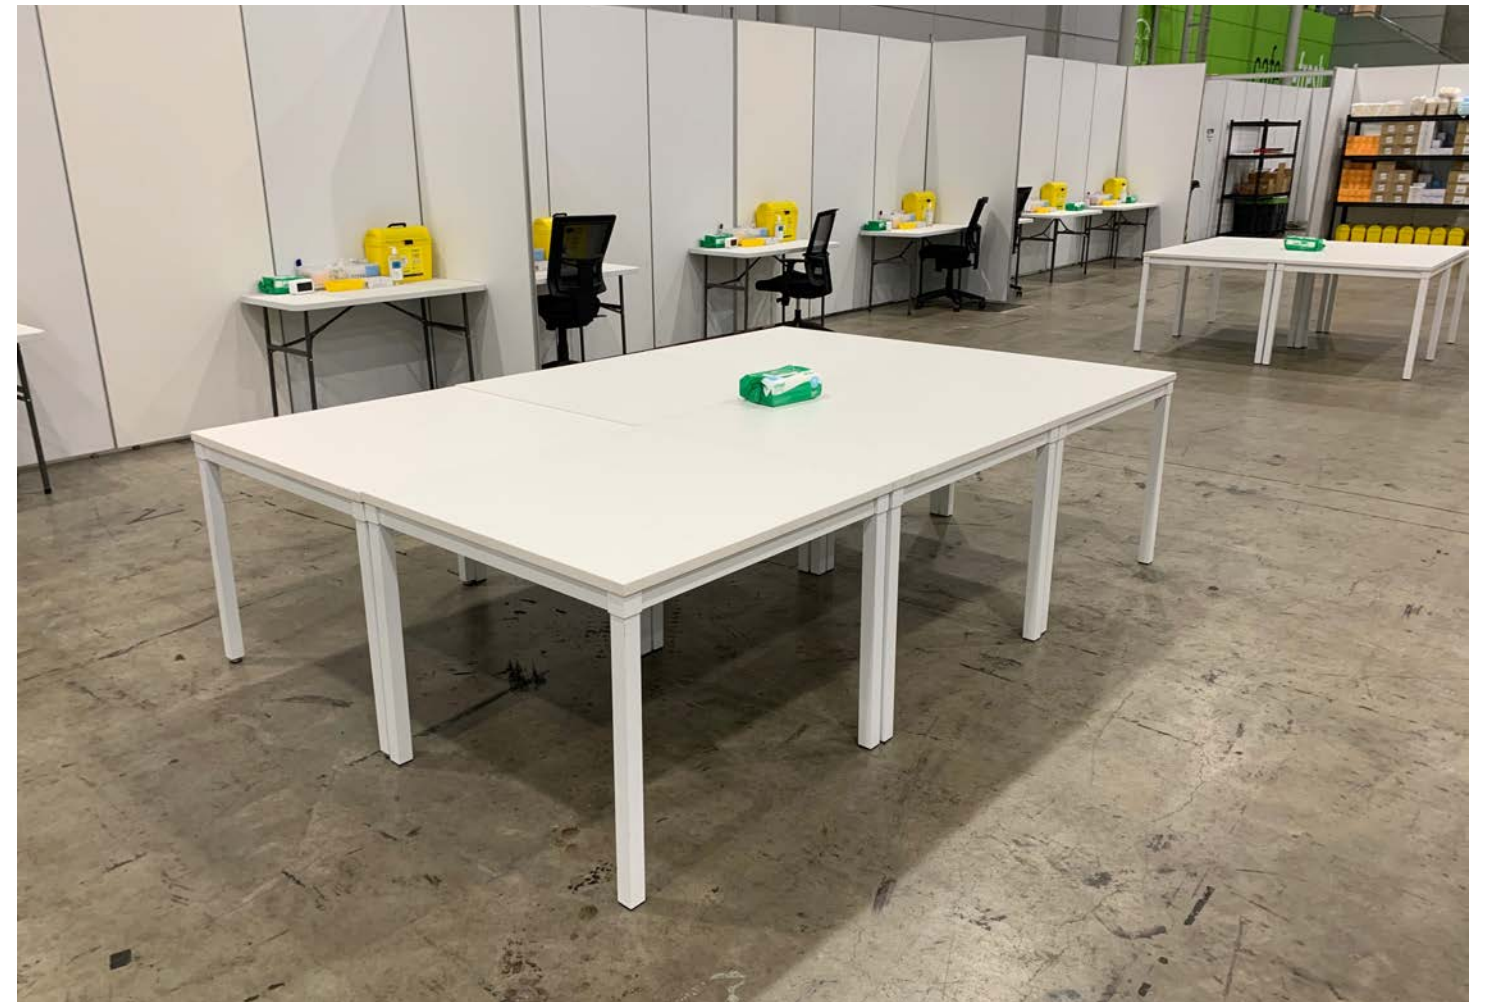

South Bank Vaccination Hub – Brisbane

Queensland's Largest Vaccination Hub. Built within 24 hours at the Brisbane Convention and Exhibition Centre. The hub was delivered by Queensland Health's Vaccine Command Centre supporting Metro South and the Mater to set up South Bank's Mass Vaccination Hub in Queensland. With a goal to vaccinate 3000 people per day. The build included; temporary cubicles, infection control furniture, pharmacy hubs, seating for 700 people, directional signage throughout the center and staff break out zones. For more information or imagery of this build, please contact our team.
